

The Implant Restoration Course

RC

The UK's only
course dedicated
to teaching
dentists to
restore implants

No surgery, no stress,
just restoration...

This is the ideal course for dentists starting in implant restoration.

A modular staged hands-on implant restorative course

The modules take delegates right through from getting started with dental implant restoration to managing complex cases. The content is taught using a mix of lectures, demonstrations and hands-on.

Lectures

Hands-on

Clinical application- some of our delegates restoring implants under supervision

The Implant Restoration Course

No surgery, no stress,
just restoration.

A modular staged hands-on implants restorative course

Photography, facebows, implant occlusion, marketing implants in your practice, treatment planning, restoring single, multiple & aesthetic implant cases, provisional restorations, overdentures, locators, CT scanning, implant vs. endodontic treatment managing restorative complications.

This is a practical and theoretical course that gives dentists implant restorative training and mentoring to allow them to diagnose, treatment plan and restore more complex implant cases within their practice.

The best taught course I have ever attended

Dr Maria Cavani

Great course, hands on useful and the content was easy to follow. Gained the confidence to start restoring more implants

Dr Selina Sufraz

An understanding of modern principals of implant crown placement-Excellent presentation, informative, relevant

Dr Dean Witter

Attending the course has been hugely beneficial and I wish I had done it earlier

Dr Rashed Ala-Uddin

Revision of single tooth implant-face bow-trying in metal framework first-restoring multiple back teeth. Very thorough

Dr Sabah Nasar

Course Directors

Dr Martin Wanendeya
